## Fat Lady 1 acoustic

At Cole Clark Guitars, we've applied a new understanding to an age old art. Like you, we appreciate the sound and feel of a great steel string guitar, one that reflects and projects the emotion you put into your music.

Great guitars require great tone woods, and we select our timbers with care. Even our most basic model acoustic is made from all solid timbers. Our patented manufacturing method applies the finest of control to each instrument we make, so that every instrument can be loud and lively and subtle and soft.

Play one at your local dealer. Whack it! Caress it! You'll find that it responds in kind to your touch. String response and articulation are excellent. You can option your guitar with our new pickup system. We believe this to be the best pickup yet offered. Big claim? Listen to it, then tell us what you think.

The Cole Clark Fat Lady is a truly awesome sounding instrument. It whispers, it yells and it sings, and you know that your search for the perfect acoustic guitar isn't over... 'til the Fat Lady sings!
